RELIUS HARDWARE REQUIREMENTS
Last Revised March 28, 2014

The Relius Government Forms applications are certified and supported running under various Windows operating systems and workstation hardware. Below is a list of the recommended minimum requirements for acceptable performance of the application and related components. Note that your performance will vary based on the workload, open applications, memory, multi-tasking, and network infrastructure. Please review the material below and if you have any questions, contact Relius Technology Support or your sales representative. These recommended hardware requirements are designed to address a typical IT environment. For more information or to discuss your specific needs in more detail, please call us today at 800-326-7235, ext. 1100.

Stand-alone or Workstations (base system) with or without WebClient

- Intel or AMD processor 2.0 GHZ or greater
- Minimum 1GB RAM or greater
- Local CD-ROM drive
- Minimum 4GB free space on C:\ drive
